ATM UPS

ATMs plays a very significant role in banking and it became important, not only in retaining customers but also gaining a competitive advantage. That's why great efforts are taken by banks and service providers to ensure that the ATM is running 24x7. And the most compulsory entity you need is clean & continuous power. Majority of the ATM are down just because of power failure.

Champion UPS ensures clean and uninterrupted power to the ATM. It is designed to work efficiently even if the grid power is low or high. Heavy duty charger enables the batteries to charge sufficiently, resulting the ATM being running for several hours at a stretch even during long power outages.

Install Champion UPS & we will help you in delivering high level of customer's satisfaction and improving customer's loyalty.
